

Ezeugonna Franklyn Ifeanyi

I'm a software engineer, system architect, and open-source maintainer building **software systems, blockchain infrastructure, and developer communities**. I take products from concept to deployment, with a focus on Web3, distributed systems, security, automation, and AI. I build **strong communities** around projects and ecosystems, leveraging my problem-solving, decision-making, and collaboration skills.

SOME PROJECTS

Defi-Watcher – Real-Time Defi Monitoring Tool:

I developed a Defi-Watcher – a real-time monitoring tool for DeFi protocols built with Node.js and TypeScript.

[\(View Project\)](#)

DeFi Stable Coin:

I developed a decentralized stable coin protocol, backed by WETH and WBTC collateral, allowing users to mint stable coins by locking either WETH or WBTC or both as collateral.
